EDUCATION

University of Colorado Boulder

Master of Science in Computer Science

Boulder, CO

Apr. 2024 – Jul. 2025

Goldsmiths, University of London

Bachelor of Music

London, UK

Sep. 2015 – Jun. 2018

EXPERIENCE

Software Development Lead

Westland Real Estate Group

Dec. 2024 – Present

Remote

- Serve as software team lead, running day-to-day development for a team of 2 developers—mentorship, code reviews, technical guidance, and execution across multiple systems and projects.
- Cut cloud costs by 50% (nearly \$20K/year) through VM audits, rightsizing, and migration to serverless.
- Expanded an inherited single-purpose invoice app into a multi-module financial operations platform—building modules to ingest vendor statements and third-party credit-card transactions, replacing a costly third-party extraction service with an LLM-based solution, and automating data entry previously done manually into the company CRM.
- As part of a shift toward a microservices architecture, independently building a position-management service that acts as the source of truth for the company's staffing structure—integrating with internal employee and HRIS services to manage positions, organizational units, and staffing changes.

Software Developer

Westland Real Estate Group

Mar. 2023 – Dec. 2024

Remote

- Developed an internal data-integration app for creating and managing bidirectional sync jobs between BigQuery and multiple sources, including Glide, Google Sheets, and the company CRM.
- Built an entity management platform that centralized the company's network of legal entities and their associated data and relationships—previously siloed across scattered files and spreadsheets—into a single source of truth.
- Redesigned Entrata CRM data pipeline using Cloud Functions, cutting runtime by 75% and substantially reducing costs while improving maintainability.
- Developed and maintained numerous automated data-ingestion and reporting pipelines connecting third-party services to the company's data warehouse.

Junior Software Developer

Westland Real Estate Group

Apr. 2022 – Mar. 2023

Remote

- Contributed to development of an internal bank reconciliation app.
- Built and maintained Python ETL scripts ingesting HRIS and other platform data to BigQuery.

IT Engineer

Synergy Associates

Aug. 2021 – Apr. 2022

Los Angeles, CA

- Provided on-site IT support as well as remote monitoring for global clients.

Software Developer (Part-time)

Paliza Consulting

Jun. 2020 – Jan. 2025

Remote

- Built and maintained Python ETL tools for parsing and visualizing energy industry data.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Bash, Python, HTML

Frameworks: React, Next.js, Node.js, Express, TypeORM, Drizzle, Material UI, Tailwind CSS, Redux, Flask

Cloud/Tools: GCP, Cloud Run, Cloud Functions, Compute Engine, BigQuery, Pub/Sub, Cloud SQL, PostgreSQL, Firebase, Git/GitHub/GitLab, Postman, pgAdmin

Other: CI/CD, Unit/Integration/E2E Testing, Linux, Serverless, LLM-assisted development (Claude Code)
